General Art Guidelines

1-color Pad Imprint

Art files should be flattened to 1 color solid black and sized for 2.5" x 3.5" max. imprint area. We accept most standard image file formats. Please make sure the artwork is at least 200dpi and approved by the customer for 1-color pad decoration. We do NOT use silk-screen decorations unless specifically requested- Our decoration utilizes soft, minimally textured pad inks which are absorbed by the threads, instead of layering on top of the cloth.

Digital Sublimation Imprint

Art files should ideally be Adobe PDF files, but we accept any other high resolution Adobe files. MPC-K2 cloth size is 5.5" x 6.3", MPC-L21P cloth size is 7.1" x 7.5". Please make sure the artwork is at least 200dpi and approved by the customer for 4 color process CMYK color band. If customer requires specific PMS colors, please indicate on the artwork or PO, we will match as close as possible. If possible, please provide company logos as separate files/layers from the background art. Please provide 1/4" bleed around the artwork if it is to be printed full bleed. If your image file is in a different file format please send it to us anyway, we will let you know if we cannot work with it.
